

Week 4 Virtual Field Trip: Underwater Neighbors

Monterey Bay Aquarium Live Cams · large-print family guide

Destination

Monterey Bay Aquarium Live Cams
[Open the official live-cam collection](#)

Navigation rating

Independent navigation: 3/5. An adult should open the official page, choose a live cam, manage audio, and help switch views. Live animals may move off camera.

Before you watch

Choose one cam. Predict: What animal behaviors or habitat features might you notice?

Look closely

Watch quietly for five minutes. Notice movement, body parts, interactions, shelter, water, light, and food clues.

Oaklynn · Grade 2 evidence

Record three observations. Label one habitat feature. Explain how one animal behavior or body part may help it survive. Compare two moments or two animals.

Brooksley · Kindergarten evidence

Draw one animal and one part of its habitat. Point to or dictate one thing the animal did. Circle: swimming • resting • eating • hiding.

My field notes

Animal: _____ Cam: _____

I noticed: _____

The habitat had: _____

This may help the animal because: _____

Adult note

Preview the page and supervise navigation. If the cam is quiet, model patient observation or choose another live cam. Save one drawing or observation page only if this optional trip is completed.
